

Standard Operating Procedures 3063.1
Skinning OnTheMap to State Websites
April 16, 2010

I. PURPOSE

This Standard Operating Procedure (SOP) supplements SOP 3060 to skin the Local Employment Dynamics (LED) analytical tool OnTheMap to the state partner's website. To view these SOPs, visit <http://lehd.did.census.gov/led/partneronly/sop.html>.

II. STANDARD PROCEDURES

Define a frame-based webpage on your website and insert the Uniform Resource Locator (URL) for OnTheMap.

The following html codes create a webpage with a top and bottom row, as well as a left column:

```
<HTML>
<HEAD>
<TITLE>Title of Page</TITLE>
</HEAD>
<FRAMESET ROWS="x%, y%, z%" FRAMEBORDER=0 FRAMESPACING=0>
<FRAME SRC="top.html" SCROLLING="NO">
<FRAMESET COLS="xx%" FRAMEBORDER=0 FRAMESPACING=0>
<FRAME SRC="left.html" SCROLLING="NO">
<FRAME SRC="http://lehdmap3.did.census.gov/themap3/">
</FRAMESET>
<FRAME SRC="bottom.html" SCROLLING="NO">
</FRAMESET>
</HTML>
```

where **Title of Page, ??%, top.html, left.html, and bottom.html** will be site-specific according to the user's preference.

III. NOTES

1. Many features and options are available in implementing skinning. The above steps represent one approach, with basic steps and codes that have proven to work. They do not represent the only approach or the best approach that a user may take to skin OnTheMap.
2. OnTheMap should be allowed maximum screen size due to its many features and mapping requirements.
3. LED may upgrade the codes as appropriate. Release of future versions of OnTheMap will require modification of the corresponding URL in the above codes.

4. State partners may enhance or refine the source codes as they see appropriate. Examples of successful implementations may be found in SOP 3060.

IV. POINTS OF CONTACT

Please contact the following when you plan to start skinning or have questions about skinning LED analytical tools:

Production Branch (301)-763-8303 CES.LEHD.Production.List@census.gov
